## *The Benefits of Membership*

Credit unions generally provide financial benefits to members through lower loan rates, high savings rates, and fewer fees than banking institutions.

The Credit Union National Association (CUNA) estimates that Arizona credit unions provided \$83,352,681 in direct financial benefits to the state's 1,430,844 members during the twelve months ending September 2014.

**These benefits are equivalent to \$58 per member or \$111 per member household <sup>(1)</sup>.**

Estimated total benefits of credit union membership are calculated by accounting for differences in credit union and bank pricing. Specifically, average credit union savings account yields, loan interest rates and fees are compared to average bank savings account yields, loan interest rates and fees. The interest rate differences are then applied to respective average credit union loan and savings balances. Fee differences are weighted and applied to credit union non-interest income to obtain the total estimated benefits arising from fees.

The per-member and per-household benefits delivered by Arizona credit unions are substantial, but these benefits are averages. Mathematically, that means the total benefits provided are divided across all members (or all member households) - even those who conduct very little financial business with Arizona credit unions.

Consider this:

**Financing a \$25,000 new automobile for 60 months at a Arizona credit union will save members an average \$116 per year in interest expense compared to what they would pay at a banking institution in the state.**

Further, loyal members - those who use the credit union extensively - often receive total financial benefits that are much greater than the average.

Arizona credit unions excel in providing member benefits on many loan and savings products. In particular, Arizona credit unions offer lower average loan rates on the following accounts: new car loans, used car loans, personal unsecured loans, first mortgage-fixed rate, credit cards loans.

Arizona credit unions also pay members higher average dividends on the following accounts: money market accounts, certificate accounts, IRAs.
