A small but significant presence in the community

Credit unions represent a growing, but small segment of the state's financial sector. Banks control 100% of deposits in Delaware. Big banks have aggressively expanded market share in the state and represent the biggest competitive challenge to the state's small institutions.

Out-of-state banks control 97% of total bank deposits in the state - a share that has increased by 61 percentage points over the past two decades.

Delaware Average Interest Rates

A structural difference that produces big benefits

Credit unions are not-for-profit financial cooperatives and, unlike banks, have no shareholders demanding a market return on their investment. This structural difference allows credit unions to pass profits on to their member-depositors in the form of lower loan interest rates, higher yields on savings and fewer/lower fees.

Delaware Mid-Year 2014 Market Share

A better deal for consumers

The lower credit union average new car loan rate shown in the graph results in a savings of \$906 over the life of a 5-year car loan (assuming an average \$30,000 amount financed).
